

HOW TO CHOOSE THE RIGHT OUTDOOR BLINDS FOR YOUR HOME

How To Choose The Right Outdoor Blinds For Your Home

Our team has been making and installing outdoor blinds for over 10 years. We offer professional advice, premium locally made products and full-service custom solutions to suit your home and needs.

Our range is made up of 4 different outdoor blinds that offer customers unique benefits and purpose. If you're considering installing outdoor blinds to your alfresco you have come to the right place.

We have a **free measure, quote and design consultation** available to ensure you choose the right type of outdoor blinds for your home. At your appointment, we work through a 4 stage process.

01

What do you want to achieve by installing the outdoor blinds?

Are you looking for Sunblock out? Stopping the rain? Reducing the strong breeze? Or increasing privacy?

Blinds offer a range of benefits and identifying why and what you hope to achieve with the outdoor blinds will help choose what model is right for your home.

How often will you be using your blinds?

Daily? Weekly?

How will you operate them?

Electrically? By remote? Or by hand?

02

The operating method is a crucial factor in the outdoor blind selection process.

Too often we see outdoor blinds installed on tall openings and people can hardly reach the operator blinds that are too large to be opened by hand with ease; our consultant will go through each blind and demonstrate how easy they are to use so that together you can work out what model of blind is right for your home.

03

Selections

Each outdoor blind has a different frame and hood, selecting a look your happy with is important to keep the aesthetics of your outdoor area looking sleek. Colour selection and Fabric selection are important and also can vary the price, it's important to touch feel and visualize the fabric and framework in your home.

We believe our Nu Style outdoor blinds should not only be functional but also add style to your home looking pleasant and allowing you to maximise your outdoor living all year round. All of our fabrics are welded locally and are made of the best quality pvc's and canvas available. We also custom make each blind locally at our Perth factory in Malaga.

04

How will the blinds be installed?

This is where it gets a bit technical, all of our consultants have been involved in the manufacture process and installation of our products before, so they can explain in detail where the blind will be fitted, it is important to differentiate how a face fitted blind will look to a reveal-based blind.

Manual and Electric blinds prefer different installation styles as powering the motor is of importance with electrics. With manuals, it's important to have the operating handle to the area the blind will be most commonly used from.

Brick homes can be quite straightforward but timber or steel patios and verandahs can require a level of expertise, certain models will work better being fitted in the face or reveal dependent on the structure of your home.

Confusing? Not to worry, we make all of the above too easy! It's our job!
