Promesh Security Doors and Windows

Peace of mind protection
for your home and family

Secure your home and protect your loved ones by installing security doors and screens. We use Promesh316® premium grade stainless steel, tough SecureGrille and steel frame security doors for extra strength. Our triple locking system for security doors is made to meet Australian Standard for quality.

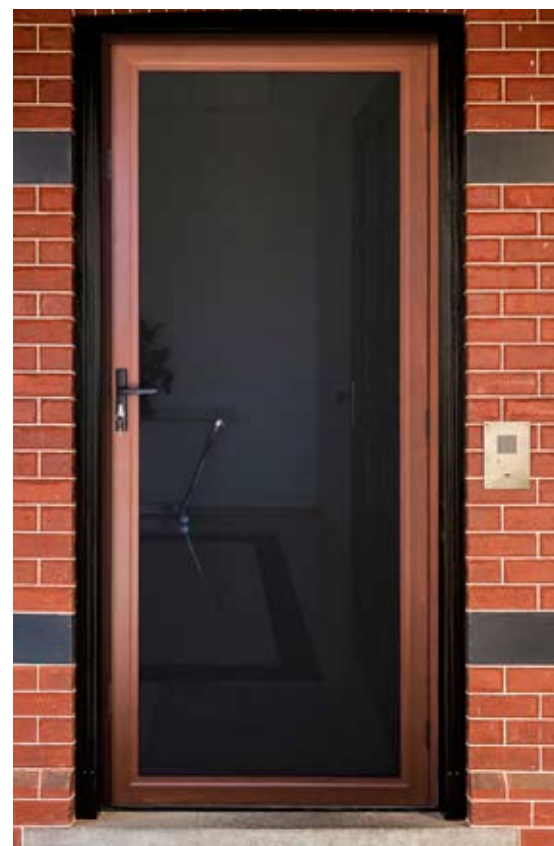

PROMESH316® Security Doors

PROMESH316® is the premium security screen system designed and manufactured in WA.

Why choose a PROMESH316® security door?

The PROMESH316® security screen range is manufactured with **0.9mm 316 marine grade high-tensile stainless steel wire**. This wire, which is 12.5% thicker than many other security mesh brands currently used in the industry, is sourced for its quality, strength and reliability. Our unique **Retaining Hook System** provides exceptional strength compared to standard manufacturing processes.

PROMESH316® security doors and security screens are harder to cut or penetrate. Designed to not only keep the flies or mosquitoes out but also the burglars as well. It's good to know that you can rely us to keep your family safe.

Premium quality offering maximum security

PROMESH316® Retaining Hook System (RHS)

PROMESH316® security screens are constructed using our unique Retaining Hook System.

Manufacture involves a 60 tonne hydraulic press forming a foldback portion along all sides of the mesh.

The mesh grips within the recess of the frame, locked under tension and cannot be removed.

To complete the process a corrosion insulator and finishing wedge is applied.

Custom made heavy duty 6063 architectural aluminium security frame for added strength

Premium 0.9mm T316 marine grade stainless steel wire mesh with 900-950MPa high-tensile strength

Bush fire compliant 1.64mm mesh aperture size with 41.69% open area allowing air flow and saving dollars on energy costs

Triple locking system installed on all hinged, sliding and stacking security doors as standard

Heavy duty stainless steel bearings used on all sliding and stacking door wheels as standard

Optional automatic sliding door closer for pool regulations

Wide product range

All security doors and security window screens are custom built to any size.

- Hinged Security Doors
- Sliding Security Doors
- Stacking Security Doors
- Window Security Screens
- Patio Enclosure Screens
- Pool Regulation Doors
- Escape Screens
- Servery Screens
- Portico Enclosure Doors

Custom built to suit any application

All screens are custom built in our local manufacturing facility, made to measure to suit your exact requirements.

PROMESH316® security screens are used in many situations including:

- Residential Homes
- Retail Outlets
- WA Schools
- Child Care Facilities
- WA Prisons
- Bushfire Protection

Australia's best security screen warranty

PROMESH316® security screens come with a 20 Year manufacturer's warranty.

T316 marine grade high-tensile stainless steel mesh

T316 stainless steel contains an additional substance, molybdenum, which gives higher protection from corrosion. It is especially beneficial for installations within 10km of areas where pollutants are more prevalent, such as close to pools, spas, rivers, coast or industrial areas.

Independent testing

PROMESH316® security screens have independently been tested at a NATA test facility to ensure they pass and exceed Australian Standards.

Knife Shear Test AS5039 & AS5041	Cyclone Debris Test AS1170.2
Dynamic Impact Test AS5039 & AS5041	Salt Spray Corrosion Test AS2331.3
